B = Burn	C = Crease
D = Dent	E = Bent
L = Lip	K = Buckle
H = Hail	J = Rip or Crack

000 = No Damage (all zero)

Damage Locations always follow the same pattern: Front to back, top to bottom, left to right (as seen from driver's seat), in an iSî pattern, with locations for door handles and mirrors. Codes are location, damage, and hours. Example: i2D1î is a one hour dent in location 2. There may be a primary and secondary code per part, as in i2D1,4S2î. If there is no damage on a part the code is 000 (as three zeros). Zero as a location indicates the entire panel, as in 0H4 (all over hail damage, 4 hours).

# Standard Cut Guidelines

## Front Section Full Cut & Long Rear Body Assembly And Roof Cut

Note: Partial Cut  
Cut anywhere ahead of Cowl (Firewall)

Cut at least 2' (51mm) beyond center of door opening for reassembly

\*Note: Complete unitized frame rail part of assembly

## Roof Assembly Cut

## Short Rear Body Assembly Cut

\*Note: Complete unitized frame rail part of assembly

## Quarter Panel Assembly Cut

Avoid Seat Belt Anchoring Area

\*Note: Complete unitized frame rail part of assembly
